

Hurricane Pumparedness™

From Thompson Pump

Experience Innovation

THE TIME TO PREPARE IS NOW.

The Thompson Pump family is dedicated to helping pump owners and municipalities weather the storm. Here are a number of ways you can “Pumpare” now to minimize the risks of downtime during and after a storm.

-  **INSPECT YOUR PUMPS**
Now is the time to identify potential problems
-  **SERVICE YOUR PUMPS**
Make sure they're properly maintained and ready for increased demand
-  **CORRECT FITTINGS & HOSES**
A storm is not the right time to find out they're worn or mismatched
-  **CLEAN OUT DRAINS**
Clear all storm drains and culverts in the area to prevent blockage
-  **PUMP DOWN LAKES & PONDS**
Reducing water levels in retention ponds and reservoirs can prevent flooding
-  **CHECK FUEL SUPPLIES**
Fuel can be scarce before, during and after a storm
-  **SPARE PARTS**
Identify and stock up for normal maintenance emergency repairs

Hurricane and storm preparedness is a year-round job. Thompson Pump manufactures a complete line of pumps for inclement weather and emergency response.
