

MASSASONIC®

By Massa Products Corporation

Proximity Sensing Suitable for Any Application

MassaSonic Sensors incorporate state-of-the-art ultrasonic and micro-processing technology to provide precision non-contact distance measurement and object detection.

MassaSonic PulStar®

The PulStar Family of Sensors provide reliable continuous level or distance measurement of fluids, pastes, or solid bulk materials for tank level monitoring, factory automation, process control, and object detection.

- Range from 4 inches to 20 feet
- mA or V outputs
- RS-485 Compatible

MassaSonic FlatPack®

The FlatPack's Advanced Beam Angle Technology provides superior detection, even with turbulent or uneven surfaces. Patented design allows the sensor to fit in tight spaces and challenging environments.

- Range from 1 inch to 13 feet
- Dual Transducers
- Dimensions: 5.10 x 2.50 x 1.25 inches
